

ABSTRACT OF THE DISCLOSURE

The present invention provides an image forming apparatus comprising a laminate object conveying device for conveying an object to be laminated, i.e., a  
5 laminate object, a laminating device for effecting laminate processing on the laminate object, a drying device for drying the laminate object before the laminate object is laminated by the laminating device, and a device for changing a temperature of the drying  
10 device between before and when the laminate object is conveyed to the drying device.
